DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 13 & 14 are rejected under 35 U.S.C. 102(e) as being anticipated by Lee (US Patent No. 2003/0209024). Lee discloses an air conditioner apparatus comprising: a fan having characteristics of an axial fan and inherently capable of blowing air in a parallel direction as an axial fan and further discloses a shroud (50) surrounding the said fan with an orifice opening at an end face (see figures).

Allowable Subject Matter

Claims 1-12 are allowed over the prior art of record.

Claims 15-17 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP

Art Unit: 3744
